Abhishek Anandaram

Full Stack Java Developer
Email: abhisheksa.09@gmail.com | **Mobile**: +31 6 22 22 36 98 |
LinkedIn: linkedin.com/in/abhishek-s-a-55bab92a
Location: Amersfoort, Netherlands
Nationality: Dutch

Summary

- **Java Developer** with **14 years of experience** designing and delivering **scalable, secure enterprise-grade applications** using **Java 17, Spring Boot 3, Hibernate/JPA, and RESTful microservices**.
- Hands-on experience building and deploying **cloud-native backend services on Microsoft Azure**, including **Azure Kubernetes Service (AKS), Azure App Services, Azure Storage and CI/CD using Azure DevOps**.
- Solid working knowledge of **SQL** and **NoSQL** databases, with supporting experience in Angular and Node.js for backend integration.
- Key contributor in **Agile teams**, with a focus on **performance optimization, security, testing, and production stability**.

Technical Skills

Backend Frameworks & Tools	Java 17, Spring Boot 3, Hibernate 6, Junit 5, Apache Kafka, ActiveMQ, Mockito, Maven, Gradle
Frontend	Angular 16
Cloud & DevOps	Azure Kubernetes Service (AKS), Azure App Services, Azure Storage, Azure DevOps (CI/CD pipelines), Docker, Kubernetes, Jenkins
Databases	MySQL, Oracle, H2, DynamoDB(NoSQL)
Monitoring & CI/CD	Prometheus, Grafana, Kibana, SonarQube, GitLab

Education

- Bachelor of Engineering – Computer Science - 2011

  College - JSS Academy of Technical Education, Bangalore, India
  University - Visveswaraya Technological University

Professional Experience

- **Full Stack DevOps Engineer | Prodapt Consulting (Client: KPN) | Jan 2022 – Present**

  - Designed and developed **Spring Boot–based microservices** using **Java 17, Hibernate/JPA** and **REST APIs.**
  - Built and integrated backend **micro services** using **Apache Camel, ActiveMQ and MySQL.**
  - **Containerized the Java services** using **Docker** and **deployed** on Kubernetes-based cloud platforms.
  - Built and maintained **CI/CD pipelines** using Jenkins and **Azure DevOps**, enforcing quality and security gates.
  - Implemented **centralized logging and monitoring** using **Elastic Stack**.
  - Mentored junior developers and supported production systems, resolving critical incidents.

- **Full Stack Developer | Infosys NL(Client: ABN Amro Bank) | Jul 2021 – Dec 2021**

  - Built REST services for **Microsoft Teams integration**,
  - Integrated backend Spring Boot based **REST services** with frontend application using **Vue.js**.
  - Implemented **CI/CD pipelines using Azure DevOps** to support automated build, test, and deployment.
  - Served as **Scrum Master** for multiple iterations, ensuring **Agile** delivery and team coordination.

- **Application Solution Architect | FedEx Express NL | Apr 2019 – Jun 2021**

  - Led the **microservices** design team in the implementation of **API Gateway**, integration using **Apache Kafka**.
  - Designed and implemented **Java/Spring Boot** microservices, comprehensive **Swagger** documentation and advanced **error monitoring** and **log aggregation** to ensure system reliability.
  - Architected scalable **database schemas**, optimizing performance.
  - **Orchestrated** build automation with Gradle and implemented sophisticated CI/CD pipelines; containerized microservices with **Docker** for streamlined deployment on **Azure Kubernetes Service (AKS).**
  - Led the quality assurance through rigorous unit testing with JUnit and Mockito, meticulous code reviews, precise time estimations, and impact analysis documentation.

- **Senior Java Engineer | Sogeti Netherlands(Client: TomTom) | May 2017 – Apr 2019**

  - Built REST APIs for managing complex XML based configuration files with **multi-threaded caching**.
  - Created unit tests using **Mockito** framework.
  - Configured **Maven** script for project compilation and building.
  - Developed regression testing in **Python** and integrated with Jenkins for automation.

- **Java Consultant | Capgemini India (Client : ASML) | Sep 2016 – Mar 2017**

  - Developed and integrated RESTful web services using **Spring Boot** and Hibernate for key application features.
  - Transformed XSD schemas to **Swagger** templates for code generation.
  - Managed builds, dependencies with **Maven** and integrated backend services with the UI.
  - Implemented unit tests using Mockito and supported production issue resolution.
  - Translated business requirements into **technical designs** in collaboration with Business Analysts and stakeholders.

- **Senior Java Engineer | Siemens - India | Dec 2015 – Aug 2016**

  - Engineered high-quality product plugins leveraging advanced core Java concepts including Collections, Interfaces, and robust Exception Handling.
  - Had **active interactions** with customers to **rapidly diagnose** and **resolve complex technical issues**, ensuring high client satisfaction.
  - Designed and executed comprehensive unit tests, drove rigorous code reviews, and conducted detailed impact analysis and accurate time estimations.
  - Developed the **web application** using Angular 2.0 to demonstrate product capabilities and enhanced user experience.
  - Delivered critical production support, promptly addressing and resolving operational challenges to maintain system stability.

- **Programmer Analyst | Cognizant- India(Client: Bharti AXA) | Sep 2014 – Oct 2015**
  - Developed robust, **secured RESTful services** to efficiently manage the backend services.
  - Optimized SQL queries tailored to specific functional modules.
  - Integrated and aligned UI views with backend services to ensure seamless workflow according to business requirements.
  - Advocated and implemented best coding practices to enhance application quality and maintainability.

- **Programmer Analyst | Cognizant- India(Client: Delta Airlines) | June 2012 – July 2013**
  - Designed and maintained scalable **RESTful** APIs using **Spring Boot 2** with rapid prototyping of design concepts.
  - Implemented application **logging** for efficient issue debug, resolution.
  - Managed project builds and dependencies with Maven.
  - Developed comprehensive unit tests using JUnit and Mockito frameworks.
  - Mentored junior developers on Spring Boot and RESTful web service best practices.
